

ANKIT VISHWAKARMA

Oracle PL/SQL Developer | 4 Years of Experience

Noida, Uttar Pradesh | +91 7376434359 | ankitvishwakarma397@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

Oracle PL/SQL developer with 4 years of experience building and optimizing database solutions for enterprise telecom products. Skilled in stored procedures, triggers, performance tuning, multi-database environments (Oracle, PostgreSQL, MSSQL), and Camunda BPM workflow design. Proven track record owning core modules — Trouble Ticketing, Preventive Maintenance, and Access Management — end-to-end and delivering on schedule.

TECHNICAL SKILLS

Languages: SQL, PL/SQL, HTML, CSS, JavaScript

Databases: Oracle, PostgreSQL, MSSQL

PL/SQL Expertise: Stored Procedures, Functions, Triggers, Cursors, Bulk Collect, Collections, Views & Materialized Views, Indexing, Partitioning, Performance Tuning, Query Optimization, Joins, Normalization

DB Tools: SQL Developer, pgAdmin, DBeaver, Postman

Workflow / BPM: Camunda (BPMN, approval & notification workflows)

Version Control & Practices: SVN, Jira, Unit Testing, Agile, GDL

Domain: Telecom – Tower Infrastructure Management

PROFESSIONAL EXPERIENCE

Infozech Software Private Limited

Dec 2021 – Present

Software Engineer

Delhi, India

- Build and maintain the Oracle PL/SQL backend — stored procedures, functions, and triggers — for iTower, a telecom platform that manages thousands of tower sites.
- Independently led the end-to-end delivery of 10–15 change requests (CRs) with a small 2–3 member team, consistently delivering on schedule within a 15–20 member team.
- Worked on the L3 (Level 3) support team for 6–8 months, resolving complex production bugs and database issues within SLA timelines.
- Designed approval and notification workflows in Camunda (BPMN), automating multi-step process routing and cutting down manual coordination across teams.
- Tuned complex SQL queries and optimized indexes to speed up heavily-used reports and transactional screens.
- Work in an Agile setup using Jira — unit testing, code reviews, and database design best practices.

PROJECTS

iTower (iMaintain O&M) — Telecom Tower Maintenance Platform

Role: PL/SQL Developer (Database) | **Tech:** Oracle, PostgreSQL, PL/SQL, Camunda | **Team:** 2–3

A platform to schedule, track, and monitor maintenance activities across thousands of telecom tower sites.

- **Trouble Ticketing (TT):** Built the complete ticket flow in PL/SQL — creation, assignment, escalation, and resolution — with Camunda handling the approval and notification steps.
- **Preventive Maintenance (PM):** Developed the logic that schedules recurring site visits, updates their status automatically, and flags SLA breaches.
- **Access Management:** Created the role- and permission-based logic that controls what each user can see and do across modules.
- **Data Layer:** Designed and tuned the large, complex tables and stored procedures behind these modules, with validation logic to keep data clean and consistent across Oracle and PostgreSQL.

EDUCATION

GL Bajaj Institute of Technology & Management

2020 – 2022

Master of Computer Application (MCA)

Greater Noida, UP

IIMT College of Management

2017 – 2020

Bachelor of Computer Application (BCA)

Greater Noida, UP

Interests: Trekking, Gardening
